and wind" --- *Hugh H. Bennett and W.C. Lowdermilk, circa 1930's*

"History is largely a record of human struggle to wrest the land from nature, because man relies for sustenance on the products of the soil. "The soil itself must be the object of observation and experiment and the facts obtained must be soil facts before they can be incorporated into soil science. The science of zoology was developed through the study of animals, that of botany through the study of plants, and soil science must be developed through the study of the soil. --- *C. F. Marbut, 1920.*
